- \rightarrow Collaborated on Terms of Service Classification, an NLP problem statement that uses a two-stage knowledge distillation DL approach on low-resource devices with cutting-edge architectures like BERT to find unfair Terms of Service terms.
- \rightarrow Lead the NLP group that presented the "Sign Language Translation using Multi Context Transformer" paper at the 20^{th} Mexican International Conference on Artificial Intelligence (MICAI), Mexico City, 2021.
- → To translate the input sign video, Multi Context Transformer architecture employs transformers and runs on batched video inputs. Our model achieved comparable results with the state-of-the-art model while reducing the parameters significantly to enable the deployment of the model in more accessible devices.
- → Guided 5+ students in research, evaluated assignments and projects in Python and Machine Learning.
- → Oversaw the website development and managed the server for our research group.
- → Wrote bots for posting office hours and creating polls.
